

associations and centers ,and finally increasing the quality of agricultural and poultry products.

He added:” we have stablished the milk central labratry, by invest of one milliard tomans”.

This is the best event to better quality of husbandry products in our province during 3 months ago.

Celebration the meeting for controlling - fever of karime- kongo

Deputy of veterinary organization told: We have operated these activities for caring and defending this threatening disease: training to society, giving sampls from reported farms, reconstruction traditional husbandries, Forming new farms by veterinary organization`s obligations.

Besides we have sprayed poisons to 31 million animals and 101 million square meters aviaries and nests in our country. The head of veterinary organization announced too

We are doing vaccination over all the country and free of cost. This all over and free vaccination is acted for hay fever, sharobon, Broselobse, smallpox. Based on rates 250 million doze will be vaccinated against 8-9 different diseased by end of this year. The credit which is granted for our husbandries vaccination is about 30 miliard tomans.

Highly increasing production of broilers free–Antibiotics

Production of broilers free-Antibiotics reached to 470 tones in Isfahan province. Dr. Kimiai, charge of this project in veterinary organization of Isfahan province told: “one of the most important targets of this organization is to better quality of raw material and producing healthy food. So we have produced and supplied 470 tones broilers free-antibiotics in this year”

“This project was suggested from 1386 and finally we are able to fulfill in this year.

We are hopeful poultry producers supporting this preject, so this motto will be re-aled: The healthy animal, the healthy food, so we have healthy human” He added.

Line production of 1,700,000 tones broilers

Our country is in a high level of poult-meat production . it reaches over 2,000,000 tones.

The head of breeding association said: we have no lackage of production for poultry-meat. Mr. R. Tarkashvand added: We had producd near to 1,783,000 tones in the last year. Our per capita conusmption is 24 kg justnow, which is respected to reach to 27/5 kg later.

Our producers not willing to increase the production prices. While only by state supporting, these product`s prices will not be increased.

Now, our poultry industry is consist of over than 21,000 national layers and broilers farm and units .

Investors and farmers cannot stand more increasing prices for energy sources and water

In this leading article, “Damparvaran” analyzes the second phase of corporative bills law in agricultural section.

Though farmers, investors and agri-producers have had appropriate company and co-operation, with the first phase of this law; but it seems they cannot stand increasing prices of energy sources and water any more in the second phase of this law.

On the other side, the average of increasing prices of agricultural, poultry and dairy products is about 40 percent. So the lower ranks of society have the less buying- ability and then the production procedures will be met many problems and challenges.

The editorial in chief of “Damparvaran” referring to the state`s punishments aiming forbidding more increasing prices, criticizes these obligations are not accurate and effective.

He refers that what is needed: “economical solutions”. Our state is responsible for supporting agri-products, and suppressing the rules has no result.

Mr. Sajadi, announced the progresses of irrigation systems

Mr. Sajadi, Deputy of water, soil and industry ministry stated to some journalists: specifying 1648 milliard Tommans to 2700 water and soil projects which have been executed in 1390. We have had successful progresses in: pressured irrigating projects to 90 percents, water transforming to farmlands, 97 percents.

All of These progresses show the more attention of tenth state towards the newest irrigating systems. 374,000 ha farmlands have been equipped with pressured irrigating systems in 2 recent years. Besides 1,157,000 ha lands have been equipped with the modern (newest) irrigation system all around the country.

By executing 25,332 kilometers, piping systems has caused highly water saving during 2 past years.

He added: Its specified, 500 milliard tommans for yielding water, which is highly important for water saving.

Alborz province willing to be more progressed

Engineer .A. M. Khaki, The head of jihade-e- agriculture of Alborz province expressed to some reporters about this association`s performances in the last year.

He expressed: while lackage of farmlands and water sources, we have operated successful agricultural, poultry and husbandry activities. The main target is to increasing the quality of our activities, not only quantity. We try to pay more attention towards production management, pest defending, mechanized cultivation, bettering farms and units, progressing greenhouse activities, more cooperation with academic and researching
