

experts of Fars province, citizens of Shiraz have participated.

This company talked about 250 new products which have recently distributed in public market.

“Pegah” now is enabled to supply needed adequetes in dairy industry which have been imported from foreign countries with high range of expences.

Iran Milk Industries company had invited 300 people from other provinces while preparing them plane ticket and hotel accommodation in Shiraz.

Of course 30 reporters and cameraman were participated in this grand festival.

## The Golden Year of Mechanization: 1393

Dr. K. Abbasi, The head of agricultural mechanization had an interview with reporter of Damparvaran. He told:

By starting of 11th state and unexpected attention towards agricultural sectors, we have considered a credit about 750 milliard tommons for this part, while 90 percent of this credit had been utilized at 7 or 8 first months of year.

He talked about a complete project of 12-years on developing of mechanization.

So we name the year of 2014 (1393) as: “The Golden Year of Mechanization Development”

He added: “We are producing 90 – 95 percent of our needed vehichels. But we are importing race, sugar beet, sugar, cotton cultivating machinaries.

## Is there any hope of rescue for Orumieh Lake?

It's about 8-9 years that Orumieh Lake is objected to be drained and dried. Many of objections from eco-system lovers, academics and citizens of west and east Azerbaijan, Kordistan have occurred.

Dr. Rohani had been promised at the first of his presidential period for forming a committee by name of “Restoring of Orumieh’s Staff”

This staff started to work seriously by managing of Dr. Jahangiri and Dr. Kalantari, with co – operation of Sanaati – Sharif university , and also 500 national experts and 50 professors from some other countries.

A credit near to 5 milliard dollars (15000 milliard Tommons) has been specified for this grand project up to 2023. So we are hopeful this project will be ended successfully up to 2023(1402).

## War of milk price and its solutions

As nearly the prime state announced that raw milk will be bought nearly for half dollars (1440 tomans) from producers, the writer of this article has suggested a guide line for reaching to a conclusion. Of course he has considered 3 aspects of it: 1-producers of raw milk and dairy industries 2-husbandries 3-consumers.

The editor of this article refers to worriness and lackages of this decision as: - less selling of raw milk –inflation which endangers usage of this vital food among public society – increasing near to 30 percent for dairy products. So editor suggests this solution as below: The new announced price for each killo of raw milk should be conducted for first six month of year; but a monthly milk -card should be issued for lower degrees of society about 5dollars (15000 tomans) for a definite period of time. In this case the price of raw milk will be fixed on half dollars (1440 tomans) for each killo, and also we will have a positive competition on market and then with preparing these milk cards, usage of milk will not be deleted among Iranian families.

## Celebrating of 7th National Specialized Technology of Infrastructure agricultural Exhibition

This specialized show will be celebrated on 14-17 October (25–29 Mehr) in Alborz province. In this year it will be formed in a higher level with companies from 27 province of our country.

This national show is more important because our 11th state have has more attention to agriculture and new irrigating mechanization; also it has training effects on visitors. For the first time cultivators of summer crops, vegetables, wheat and grains are participated in too. It's sayable we will have visitors from 32 provinces.

## PEGAH's Festival beyond Celebration, Having Modern Models for Development

Iran milk industries company (Pegah) has formed and managed an exhibition by theme of "Research and Development", (R&D).

In this grand gathering large amount of statemen, majlis representatives, husbandry

In the name of GOD
