Analysing Animal Husbandry Events in the Last year

Eng. Ahmad Ghalandary a famous farmer, is the one who has many activities in Golestan province.

He told some topics about animal husbandry in the last year and analysed the conditions. He said both of inflation and stagnancy are continue that hurt on national production. We expected that Economy Minister can control the Inflation and increase investment in this sector.

He added: the observations to agriculture sector in 11th government have many differences to the past because eng. Hojati, the Agriculture Minister, believes the fundamentals of agriculture must be supported.

The increase of currencies in 10th government made a shock to animal husbandry activities and the final cost rate of milk and meat went high.

Another subjects like breeding, genomic species, and milk – meat cows showed that agriculture ministry has decided to support the farmers.

Eng. Ghalandary declared: to buy the milk in 14400 rls per kilo to convert to milk powder had affected seriously the milk produce and all of the farmers are interested in improving their activities.

The last transitions in cow Genetics

Eng. Salary is one of the most famous individuals who has done many activities in animal breeding and usage the global Genetic resources. He cooperates to “World wide sires” company to transfer the knowledge of Genetics to Iran.

In the last summit which was held at the beginning of Esfand (Feb.) in Olympic Hotel, Iran, two of the managers of “world wide sires” company and many of experts and farmers were attended there. Prof. Gary o. Fassett as the first lecturer said: Just now, we are looking for 10 tons milk per year for a cow, in spite of declining about 23% of the farms. By this way, we saved 90% in the grounds, 35% in water, 24% in manure, and 43% in Methan gas.

He added: now, we have 9/ 100/000 head cows in USA that 1/10 [one tenth] of them are selected as excellent cows to transfer their genes.

Dr. Joel L.Mergler was the second lecturer who said: “world wide sires” Company has 3000 head of excellent bulls, now. We have sold more than 18 million dose of Sperm all over the world in 2014 and our aim is to increase it to 20 million dose in 2020.

He added: we export the sperms to 90 Countries but 10 of them are superior buyers and Iran is one of them.

Editorial:

According to Interior ministry the 10th election of parliament representatives will occur in 14/12/1394 (Feb. 2016). From now, many secret activities to make groups and cooperations are formed. We believe, because of the absence of distinguished parties, voters have to vote to individuals instead of plans or programs. Such representatives have no clear party relation, so they are wander in the parliament, too.

Fundamentally, such election is not on the base of parties` plans but to obtain a seat in the Parliament.

Damparvaran mag. Editor – in – Chief believes, in this circumstances all of promises about agriculture and farmers will neglect after the end of the election time, because till now, all of the ways to defend from agriculture sector have not been succeeded in the past years, so we suggest to central council of Keshavarz House to inter in future championship and introduce individuals who think about the agriculture and farmers conditions.

Agriculture and farmers are losers from now

The election in Industry, mines and Agriculture Trade Rooms will be held in 18/12/1393 all over the the country. Unfortunately, the election conditions is like the past and the farmers` rights is the same as the last years.

Apparently, this election is democratic, but the reality is different, because this election is on the base of trade cards. He said that about 50/000 individuals have these cards but only 1000 belong to the farmers or one against 49 vote.

It is clear that the majority of farmers have no trade cards because they don`t have any information about is.

In G.D.P, agriculture sector has a 14% share, but it can`t achive a suitable position in regional trade Romms. The only way to get the real position by farmers is to held an election among them in every provience primarily, and elect 6 individuals for every Trade room.

So, such elections in rtade rooms make the farmers as historical losers, therefor some fundamental changes in this election is needed.

The Important Events in Poultry industry in 1393

In this issue, Damparvaran Magazine interviewed union, societies and national managers that are expert and clear – sighted in poultry industry, about the industry conditions in 1393 (2014).

In these interviews more than 20 persons of specialists and managers told their opinions to Damparvaran correspondent. In these disputes, the managers criticized the government policies and suggested the solutions to dissolve the poultry industry problems.

Damparvaran magazine main question was: “Piont to important positive and negative
