

Endless destiny of 1.5 milliard \$ to rural employment

The leading article in this issue is to allocate 1.5 milliard dollar to create employment and develop rural regions.

M. Ansari while confirmed on this direction, but criticized the expanding of this amount, because one of the president assistants, Dr. Razvani, has said: we will establish 1000 villages by this amount.

It is worth to remind that we have more than 6000 villages with more than 50 years age in the country. It is better to spend this amount to develop processing industries in full modern technologies, in small size.

We have to warn that expending this credit in cash to help the villagers, will high the inflation and will cause many problems to governments. We recommend, these dollars must expand to produce and create employment for villagers.

Interpellation, right or rant

It is clear that interpellate is the legal right for every representative in Islamic Consultative Assembly. But the representatives use it in a wrong way. We see this legal right is changed to a rant to force on ministers to catch illegal rights. It is believed that this way is very commonplace and has no any relation to defend on farmers or other people rights.

Interpellate plan on Eng. Hojatti, agriculture minister only 40 days after the vote of confidence, is not along the farmers rights. One reason around this matter is the incapability of the ministry to convince public opinion,

Low cost poultry in Iran

In last weeks poultry cost has fallen strictly and many of producers lost their invests. So some of poultry producers gathered in front of presidential building. They tried to attract responsible look to poultry industry.

To function a balance in market, support animal affair company began to buy and store poultry from slaughter houses.

Eng, Hassan zade, managing director of poultry union was worried about the condition and said: the support animal affair company must buy in concentrate the poultry from cooperatives at least 64000 RLS.

Villagers emigration, the endless plight for all governments

The writer of this subject, Mr. Dezfooli tried to look over the subject higher than the official policies of governments. It is more than 50 years that inauspicious and disastrous phenomenon of rural migrant to cities because of arhythmic development caused many problems for governments. Also the absence of modern processing industries has made abed to mass emigration from villages.

This problem will involve all the future governments with this disagreeable difficult.
